

Dear Dr. Bolouri

We were pleased to have had the opportunity to participate in your research study in treating mild to moderate alzheimers.

Your staff was extremely supportive and encouraging.

A special thanks to Laura Wood who always met us with a warm smile and helped to put us at ease.

Our sessions with Ester were always interesting and very informative.

We hope our participation in this program will benefit those of us who are suffering from this disease.

If we can help in another way feel free to contact us .

Thanking you again,
